

Certifying for AD/AIRCON/9 Requirement 1 and 2.

AMROBA asked CASA for a ruling as to who can sign for the above AD and the following is from their Maintenance Personnel Manager. This will at least give a standard approach across Australia for our members.

“Answer to your question of who should sign for AD/AIRCON/9 Requirement 1 and 2.

The correct answer is as follows:

- 1. LAME with an Electrical Category licence endorsed with the appropriate Group 1 or 2 rating. or*
- 2. LAME with an Airframe Group 1 rating could certify if the aircraft was VFR. or*
- 3. LAME with an Engine Group 1 rating could certify if the aircraft was VFR.*

Obviously the airframe or indeed the engine LAMEs are in the best position to do the work, but CAO 100.90 Appendix thinks otherwise. Possibly we [CASA] should have amended the Appendix.”
