Part 66 B3 AME mechanical Trade Training Syllabi and Learning Levels

Module 1 Mathematics	Level of knowledge for the category
	B3
1.1 Arithmetic	2
Arithmetical terms and signs, methods of multiplication and division, fractions and decimals, factors and multiples, weights, measures and conversion factors, ratio and proportion, averages and percentages, areas and volumes, squares, cubes, square and cube roots.	
1.2 Algebra	2
(a) Evaluating simple algebraic expressions, addition, subtraction, multiplication and division, use of brackets, simple algebraic fractions;	
(b) Linear equations and their solutions; Indices and powers, negative and fractional indices; Binary and other applicable numbering systems; Simultaneous equations and second degree equations with one unknown; Logarithms.	1
1.3 Geometry	1
(a) Simple geometrical constructions;	
(b) Graphical representation, nature and uses of graphs, graphs of equations and functions;	2
(c) Simple trigonometry, trigonometrical relationships, use of tables and rectangular and polar coordinates.	2

Module 2 Physics	Level of knowledge for the category
	B3
2.1 Matter	1
Nature of matter: the chemical elements, structure of atoms, molecules; Chemical compounds; States: solid, liquid and gaseous; Changes between states.	
2.2 Mechanics	1
2.2.1 Statics Forces, moments and couples, representation as vectors; Centre of gravity; Elements of theory of stress, strain and elasticity: tension, compression, shear and torsion; Nature and properties of solid, fluid and gas; Pressure and buoyancy in liquids (barometers).	

Part 66 B3 AME mechanical Trade Training Syllabi and Learning Levels

Module 2 Physics	Level of knowledge for the category
	B3
<i>2.2.2 Kinetics</i>	
Linear movement: uniform motion in a straight line, motion under constant acceleration (motion under gravity); Rotational movement: uniform circular motion (centrifugal and centripetal forces); Periodic motion: pendular movement; Simple theory of vibration, harmonics and resonance; Velocity ratio, mechanical advantage and efficiency.	1
<i>2.2.3 Dynamics</i>	
(a) Mass; Force, inertia, work, power, energy (potential, kinetic and total energy), heat, efficiency;	1
(b) Momentum, conservation of momentum; Impulse; Gyroscopic principles; Friction: nature and effects, coefficient of friction (rolling resistance).	2
<i>2.2.4 Fluid dynamics</i>	
(a) Specific gravity and density;	2
(b) Viscosity, fluid resistance, effects of streamlining; Effects of compressibility on fluids; Static, dynamic and total pressure: Bernoulli's Theorem, venturi.	2
2.3 Thermodynamics	
(a) Temperature: thermometers and temperature scales: Celsius, Fahrenheit and Kelvin, heat definition;	2
(b) Heat capacity, specific heat; Heat transfer: convection, radiation and conduction; Volumetric expansion; First and second law of thermodynamics; Gases: ideal gases laws, specific heat at constant volume and constant pressure, work done by expanding gas; Isothermal, adiabatic expansion and compression, engine cycles, constant volume and constant pressure, refrigerators and heat pumps; Latent heats of fusion and evaporation, thermal energy, heat of combustion.	1

Module 3 Electrical fundamentals	Level of knowledge for the category
	B3
3.1 Electron theory	1

Part 66 B3 AME mechanical Trade Training Syllabi and Learning Levels

Module 3 Electrical fundamentals	Level of knowledge for the category
	B3
Structure and distribution of electrical charges within atoms, molecules, ions, compounds; Molecular structure of conductors, semiconductors and insulators.	
3.2 Static electricity and conduction	
Static electricity and distribution of electrostatic charges; Electrostatic laws of attraction and repulsion; Units of charge, Coulomb's Law; Conduction of electricity in solids, liquids, gases and vacuum.	1
3.3 Electrical terminology	
The following terms, their units and factors affecting them: potential difference, electromotive force, voltage, current, resistance, conductance, charge, conventional current flow, electron flow.	1
3.4 Generation of electricity	
Production of electricity by the following methods: light, heat, friction, pressure, chemical action, magnetism and motion.	1
3.5 DC Sources of electricity	
Construction and basic chemical action of: primary cells, secondary cells, lead acid cells, nickel cadmium cells, other Alkaline cells; Cells connected in series and parallel; Internal resistance and its effect on a battery; Construction, materials and operation of thermocouples; Operation of photo-cells.	2
3.6 DC circuits	
Ohms Law, Kirchoff's Voltage and Current Laws; Calculations using the above laws to find resistance, voltage and current; Significance of the internal resistance of a supply.	1
3.7 Resistance and resistor	
(a) Resistance and affecting factors; Specific resistance; Resistor colour code, values and tolerances, preferred values, wattage ratings; Resistors in series and parallel; Calculation of total resistance using series parallel and series parallel combinations; Operation and use of potentiometers and rheostats; Operation of Wheatstone Bridge;	1
3.8 Power	
Power, work and energy (kinetic and potential); Dissipation of power by a resistor; Power formula; Calculations involving power, work and energy.	1
3.9 Capacitance and capacitor	
Operation and function of a capacitor; Factors affecting capacitance area of plates, distance between plates, number of plates, dielectric and dielectric constant, working voltage, voltage rating;	1

Part 66 B3 AME mechanical Trade Training Syllabi and Learning Levels

Module 3 Electrical fundamentals	Level of knowledge for the category
	B3
Capacitor types, construction and function; Capacitor colour coding; Calculations of capacitance and voltage in series and parallel circuits; Exponential charge and discharge of a capacitor, time constants; Testing of capacitors.	
3.10 Magnetism	
(a) Theory of magnetism; Properties of a magnet; Action of a magnet suspended in the Earth's magnetic field; Magnetisation and demagnetisation; Magnetic shielding; Various types of magnetic material; Electromagnets construction and principles of operation; Hand clasp rules to determine: magnetic field around current carrying conductor.	1
(b) Magneto-motive force, field strength, magnetic flux density, permeability, hysteresis loop, retentivity, coercive force reluctance, saturation point, eddy currents; Precautions for care and storage of magnets.	1
3.11 Inductance and inductor	
Faraday's Law; Action of inducing a voltage in a conductor moving in a magnetic field; Induction principles; Effects of the following on the magnitude of an induced voltage: magnetic field strength, rate of change of flux, number of conductor turns; Mutual induction; The effect the rate of change of primary current and mutual inductance has on induced voltage; Factors affecting mutual inductance: number of turns in coil, physical size of coil, permeability of coil, position of coils with respect to each other; Lenz's Law and polarity determining rules; Back emf, self-induction; Saturation point; Principal uses of inductors.	1
3.12 DC motor and generator theory	
Basic motor and generator theory; Construction and purpose of components in DC generator; Operation of, and factors affecting output and direction of, current flow in DC generators; Operation of, and factors affecting output power, torque, speed and direction of rotation of DC motors; Series wound, shunt wound and compound motors; Starter generator construction.	1
3.13 AC theory	
Sinusoidal waveform: phase, period, frequency, cycle; Instantaneous, average, root mean square, peak, peak to peak current values and calculations of these values, in relation to voltage, current and power; Triangular and square waves; Single and 3 phase principles.	1

Part 66 B3 AME mechanical Trade Training Syllabi and Learning Levels

Module 3 Electrical fundamentals	Level of knowledge for the category	
	B2L	B3
3.14 Resistive (R), Capacitive (C) and Inductive (L) Circuits	1	
Phase relationship of voltage and current in L, C and R circuits, parallel, series and series parallel; Power dissipation in L, C and R circuits; Impedance, phase angle, power factor and current calculations; True power, apparent power and reactive power calculations.		
3.15 Transformers	1	
Transformer construction principles and operation; Transformer losses and methods for overcoming them; Transformer action under load and no-load conditions; Power transfer, efficiency, polarity markings; Calculation of line and phase voltages and currents; Calculation of power in a 3 phase system; Primary and secondary current, voltage, turns ratio, power, efficiency; Autotransformers.		
3.17 AC generators	1	
Rotation of loop in a magnetic field and waveform produced; Operation and construction of revolving armature and revolving field type AC generators; Single phase, 2 phase and 3 phase alternators; Three phase star and delta connections advantages and uses; Permanent magnet generators.		
3.18 AC motors	1	
Construction, principles of operation and characteristics of: AC synchronous and induction motors both single and polyphase; Methods of speed control and direction of rotation; Methods of producing a rotating field: capacitor, inductor, shaded or split pole.		

Module 4 Digital techniques electronic instrument systems	Level of knowledge for the category	
	B2L	B3
4.1 Semiconductors	1	
<i>4.1.1 Diodes</i>		
(a) Diode symbols; Diode characteristics and properties; Diodes in series and parallel; Main characteristics and use of silicon controlled rectifiers (thyristors), light emitting diode, photo conductive diode, varistor, rectifier diodes; Functional testing of diodes;	1	
<i>4.1.2 Transistors</i>		
(a) Transistor symbols; Component description and orientation; Transistor characteristics and properties;	1	

Part 66 B3 AME mechanical Trade Training Syllabi and Learning Levels

Module 4 Digital techniques electronic instrument systems	Level of knowledge for the category	
	B2L	B3
<i>4.1.3 Integrated circuits</i>	1	
(a) Description and operation of logic circuits and linear circuits and operational amplifiers;		

Module 6 Materials and hardware	Level of knowledge for the category	
	B3	
6.1 Aircraft materials ferrous	2	
(a) Characteristics, properties and identification of common alloy steels used in aircraft; Heat treatment and application of alloy steels;		
(b) Testing of ferrous materials for hardness, tensile strength, fatigue strength and impact resistance.	1	
6.2 Aircraft materials — non-ferrous	2	
(a) Characteristics, properties and identification of common non-ferrous materials used in aircraft; Heat treatment and application of non-ferrous materials;		
(b) Testing of non-ferrous material for hardness, tensile strength, fatigue strength and impact resistance.	1	
6.3 Aircraft materials — composite and non-metallic	2	
<i>6.3.1 Composite and non-metallic other than wood and fabric</i>		
(a) Characteristics, properties and identification of common composite and non-metallic materials, other than wood, used in aircraft; Sealant and bonding agents;	2	
(b) The detection of defects/deterioration in composite and non-metallic material; Repair of composite and non-metallic material.		
6.3.2 Wooden structures Construction methods of wooden airframe structures; Characteristics, properties and types of wood and glue used in aeroplanes; Preservation and maintenance of wooden structure; Types of defects in wood material and wooden structures; The detection of defects in wooden structure; Repair of wooden structure.	2	
6.3.3 Fabric covering Characteristics, properties, and types of fabrics used in aeroplanes; Inspections methods for fabric; Types of defects in fabric; Repair of fabric covering.	2	
6.4 Corrosion	1	

Part 66 B3 AME mechanical Trade Training Syllabi and Learning Levels

Module 6 Materials and hardware	Level of knowledge for the category
	B3
(a) Chemical fundamentals; Formation by galvanic action process, microbiological, stress;	
(b) Types of corrosion and their identification; Causes of corrosion; Material types, susceptibility to corrosion.	2
6.5 Fasteners	
<i>6.5.1 Screw threads</i>	2
Screw nomenclature; Thread forms, dimensions and tolerances for standard threads used in aircraft; Measuring screw threads;	
<i>6.5.2 Bolts, studs and screws</i>	2
Bolt types: specification, identification and marking of aircraft bolts, international standards; Nuts: self-locking, anchor, standard types; Machine screws: aircraft specifications; Studs: types and uses, insertion and removal; Self tapping screws, dowels.	
<i>6.5.3 Locking devices</i>	2
Tab and spring washers, locking plates, split pins, pal-nuts, wire locking, quick release fasteners, keys, circlips, cotter pins.	
<i>6.5.4 Aircraft rivets</i>	2
Types of solid and blind rivets: specifications and identification, heat treatment.	
6.6 Pipes and unions	
(a) Identification of, and types of, rigid and flexible pipes and their connectors used in aircraft;	2
(b) Standard unions for aircraft hydraulic, fuel, oil, pneumatic and air system pipes.	
6.7 Springs	1
Types of springs, materials, characteristics and applications.	
6.8 Bearings	1
Purpose of bearings, loads, material, construction; Types of bearings and their application.	
6.9 Transmissions	1
Gear types and their application; Gear ratios, reduction, and multiplication gear systems, driven and driving gears, idler gears, mesh patterns; Belts and pulleys, chains and sprockets.	
6.10 Control cables	2
Types of cables; End fittings, turn buckles and compensation devices; Pulleys and cable system components; Bowden cables; Aircraft flexible control systems.	
6.11 Electrical cables and connectors	

Part 66 B3 AME mechanical Trade Training Syllabi and Learning Levels

Module 6 Materials and hardware	Level of knowledge for the category
	B3
Cable types, construction and characteristics; High tension and co-axial cables; Crimping; Connector types, pins, plugs, sockets, insulators, current and voltage rating, coupling, identification codes.	2

Module 7B Maintenance Practices B3	Level of knowledge for the category
	B3
7.1 Safety precautions — aircraft and workshop	3
Aspects of safe working practices including precautions to take when working with electricity, gases especially oxygen, oils and chemicals; Also, instruction in the remedial action to be taken in the event of a fire or another accident with one or more of these hazards including knowledge on extinguishing agents.	
7.2 Workshop practices	3
Care of tools, control of tools, use of workshop materials; Dimensions, allowances and tolerances, standards of workmanship; Calibration of tools and equipment, calibration standards.	
7.3 Tools	3
Common hand tool types; Common power tool types; Operation and use of precision measuring tools; Lubrication equipment and methods; Operation, function and use of electrical general test equipment.	
7.4 Avionic general test equipment	1
Operation, function and use of avionic general test equipment.	
7.5 Engineering drawings, diagrams and standards	2
Drawing types and diagrams, their symbols, dimensions, tolerances and projections; Identifying title block information; Microfilm, microfiche and computerised presentations; Specification 100 of the ATA; Aeronautical and other applicable standards including ISO, AN, MS, NAS and MIL; Wiring diagrams and schematic diagrams.	
7.6 Fits and clearances	2
Drill sizes for bolt holes, classes of fits; Common system of fits and clearances; Schedule of fits and clearances for aircraft and engines; Limits for bow, twist and wear; Standard methods for checking shafts, bearings and other parts.	
7.7 Electrical Cables and Connectors	2
Continuity, insulation and bonding techniques and testing; Use of crimp tools: hand and hydraulic operated; Testing of crimp joints; Connector pin removal and insertion; Co-axial cables: testing and installation precautions; Identification of wire types, their inspection criteria and damage tolerance;	

Part 66 B3 AME mechanical Trade Training Syllabi and Learning Levels

Module 7B Maintenance Practices B3	Level of knowledge for the category
	B3
Wiring-protection techniques: cable looming and loom support, cable clamps, protective sleeving techniques, including heat shrink wrapping, shielding; EWIS installations, inspection, repair, maintenance and cleanliness standards.	
7.8 Riveting Riveted joints, rivet spacing and pitch; Tools used for riveting and dimpling; Inspection of riveted joints.	2
7.9 Pipes and Hoses Bending and belling/flaring aircraft pipes; Inspection and testing of aircraft pipes and hoses; Installation and clamping of pipes	2
7.10 Springs Inspection and testing of springs.	
7.11 Bearings Testing, cleaning and inspection of bearings; Lubrication requirements of bearings; Defects in bearings and their causes.	2
7.12 Transmissions Inspection of gears, backlash; Inspection of belts and pulleys, chains and sprockets; Inspection of screw jacks, lever devices, push-pull rod systems	2
7.13 Control Cables Swaging of end fittings; Inspection and testing of control cables; Bowden cables; aircraft flexible control systems	2
7.14 Material handling 7.14.1 Sheet Metal Marking out and calculation of bend allowance; Sheet metal working, including bending and forming; Inspection of sheet metal work	2
7.14.2 Composite and non-metallic Bonding practices; Environmental conditions; Inspection methods.	2
7.15 Welding, brazing, soldering and bonding (a) Soldering methods, inspection of soldered joints; (b) Welding and brazing methods; Inspection of welded and brazed joints; Bonding methods and inspection of bonded joints.	2
7.16 Aircraft weight and balance (a) Centre of gravity and balance limits calculation: use of relevant documents;	2
7.17 Aircraft handling and storage Aircraft taxiing and towing and associated safety precautions; Aircraft jacking, chocking, securing and associated safety precautions; Aircraft storage methods; Refuelling and defuelling procedures; De-icing and anti-icing procedures; Electrical, hydraulic and pneumatic ground supplies; Effects of environmental conditions on aircraft handling and operation.	2
7.18 Disassembly, inspection, repair and assembly techniques	3

Part 66 B3 AME mechanical Trade Training Syllabi and Learning Levels

Module 7B Maintenance Practices B3	Level of knowledge for the category
	B3
(a) Types of defects and visual inspection techniques; Corrosion removal, assessment and re-protection;	
(b) General repair methods, Structural Repair Manual; Ageing, fatigue and corrosion control programmes;	2
(c) Non-destructive inspection techniques including: penetrant, radiographic, eddy current, ultrasonic and borescope methods;	2
(d) Disassembly and re-assembly techniques;	2
(e) Trouble shooting techniques.	2
7.19 Abnormal events	
(a) Inspections following lightning strikes and HIRF penetration.	2
(b) Inspections following abnormal events such as heavy landings and flight through turbulence.	2
7.20 Maintenance procedures	
Maintenance planning; Modification procedures; Stores procedures; Certification and release procedures; Interface with aircraft operation; Maintenance inspection, quality control and quality assurance; Additional maintenance procedures; Control of life limited components.	2

Part 66 B3 AME mechanical Trade Training Syllabi and Learning Levels

Module 8 Basic aerodynamics	Level of knowledge for the category
	B3
8.1 Physics of the atmosphere	1
International Standard Atmosphere (ISA), application aerodynamics.	
8.2 Aerodynamics	1
Air flow around a body; Boundary layer, laminar and turbulent flow, free stream flow, relative airflow, up wash and downwash, vortices, stagnation; The terms: camber, chord, mean aerodynamic chord, profile (parasite) drag, induced drag, centre of pressure, angle of attack, wash in and washout, fineness ratio, wing shape and aspect ratio; Thrust, weight, aerodynamic resultant; Generation of lift and drag: angle of attack, lift coefficient, drag coefficient, polar curve, stall; Aerofoil contamination including ice, snow, frost.	
8.3 Theory of flight	1
Relationship between lift, weight, thrust and drag; Glide ratio; Steady state flights, performance; Theory of the turn; Influence of load factor: stall, flight envelope and structural limitations; Lift augmentation.	
8.4 Flight stability and dynamics	1
Longitudinal, lateral and directional stability (active and passive).	

Module 9B Human Factors	Level of knowledge for the category
	B3
9.1 General	2
The need to take human factors into account; Incidents attributable to human factors and human error; “Murphy’s” law.	
9.2 Human performance and limitations	2
Vision; Hearing; Information processing; Attention and perception; Memory; Claustrophobia and physical access.	
9.3 Social psychology	1
Responsibility: individual and group; Motivation and de-motivation; Peer pressure; Culture issues; Team working;	

Part 66 B3 AME mechanical Trade Training Syllabi and Learning Levels

Module 9B Human Factors	Level of knowledge for the category
	B3
Management, supervision and leadership.	
9.4 Factors affecting performance	
Fitness and health; Stress: domestic and work related; Time pressure and deadlines; Workload: overload and underload; Sleep and fatigue, shiftwork; Alcohol, medication, drug abuse.	2
9.5 Physical environment	
Noise and fumes; Illumination; Climate and temperature; Motion and vibration; Working environment.	1
9.6 Tasks	
Physical work; Repetitive tasks; Visual inspection; Complex systems.	1
9.7 Communication	
Within and between teams; Work logging and recording; Keeping up-to-date, currency; Dissemination of information.	2
9.8 Human error	
Error models and theories; Types of error in maintenance tasks; Implications of errors (i.e. accidents); Avoiding and managing errors.	2
9.9 Hazards in the workplace	
Recognising and avoiding hazards; Dealing with emergencies.	2

Module 11C Piston Aeroplane Aerodynamics, Structures and Systems	Level of knowledge for the category
	B3
11.1 Theory of Flight Aeroplane Aerodynamics and Flight Controls Operation and effect of: — roll control: ailerons, — pitch control: elevators, stabilators, variable incidence stabilisers and canards, — yaw control, rudder limiters; Control using elevons, ruddervators; High lift devices, slots, slats, flaps, flaperons; Drag inducing devices, lift dumpers, speed brakes; Effects of wing fences, saw tooth leading edges; Boundary layer control using, vortex generators, stall wedges or leading edge devices; Operation and effect of trim tabs, balance and anti-balance (leading) tabs, servo tabs, spring tabs, mass balance, control surface bias, aerodynamic balance pane	1

Part 66 B3 AME mechanical Trade Training Syllabi and Learning Levels

Module 11C Piston Aeroplane Aerodynamics, Structures and Systems	Level of knowledge for the category
	B3
11.2 Airframe Structures — General Concepts (a) Airworthiness requirements for structural strength; Structural classification, primary, secondary and tertiary; Fail safe, safe life, damage tolerance concepts; Zonal and station identification systems; Stress, strain, bending, compression, shear, torsion, tension, hoop stress, fatigue; Drains and ventilation provisions; System installation provisions; Lightning strike protection provision; Aircraft bonding; 2 (b) Construction methods of: stressed skin fuselage, formers, stringers, longerons, bulkheads, frames, doublers, struts, ties, beams, floor structures, reinforcement, methods of skinning, anti- corrosive protection, wing, empennage and engine attachments; Structure assembly techniques: riveting, bolting, bonding; Methods of surface protection, such as chromating, anodising, painting; Surface cleaning; Airframe symmetry: methods of alignment and symmetry checks.	2
11.3 Airframe Structures — Aeroplanes 11.3.1 Fuselage (ATA 52/53/56) Construction; Wing, tail-plane, pylon and undercarriage attachments; Seat installation; Doors and emergency exits: construction and operation; Window and windscreen attachment	1
11.3.2 Wings (ATA 57) 1 Construction; Fuel storage; Landing gear, pylon, control surface and high lift/drag attachment	1
11.3.3 Stabilisers (ATA 55) 1 Construction; Control surface attachment	1
11.3.4 Flight Control Surfaces (ATA 55/57) Construction and attachment Balancing — mass and aerodynamic.	1
11.3.5 Nacelles/Pylons (ATA 54) Nacelles/Pylons: — Construction, — Firewalls, — Engine mounts	1
11.4 Air Conditioning (ATA 21) Heating and ventilation systems.	
11.5 Instruments/Avionic Systems 11.5.1 Instrument Systems (ATA 31) Pitot static: altimeter, air speed indicator, vertical speed indicator; Gyroscopic: artificial horizon, attitude director, direction indicator, horizontal situation indicator, turn and slip indicator, turn coordinator; Compasses: direct reading, remote reading; Angle of attack indication, stall warning systems; Glass cockpit; Other aircraft system indication.	1
11.5.2 Avionic Systems Fundamentals of system lay-outs and operation of: — Auto Flight (ATA 22), — Communications (ATA 23), — Navigation Systems (ATA 34)	1
11.6 Electrical Power (ATA 24) Batteries Installation and Operation; DC power generation; Voltage regulation; Power distribution; Circuit protection; Inverters, transformer	2
11.7 Equipment and Furnishings (ATA 25) Emergency equipment requirements; Seats, harnesses and belts.	2

Part 66 B3 AME mechanical Trade Training Syllabi and Learning Levels

Module 11C Piston Aeroplane Aerodynamics, Structures and Systems	Level of knowledge for the category
	B3
11.8 Fire Protection (ATA 26) Portable fire extinguisher	2
11.9 Flight Controls (ATA 27) Primary controls: aileron, elevator, rudder; Trim tabs; High lift devices; System operation: manual; Gust locks; Balancing and rigging; Stall warning system.	3
11.10 Fuel Systems (ATA 28) System lay-out; Fuel tanks; Supply systems; Cross-feed and transfer; Indications and warnings; Refuelling and defuelling.	2
11.11 Hydraulic Power (ATA 29) System lay-out; Hydraulic fluids; Hydraulic reservoirs and accumulators; Pressure generation: electric, mechanical; Filters; Pressure Control; Power distribution; Indication and warning systems	2
11.12 Ice and Rain Protection (ATA 30) Ice formation, classification and detection; De-icing systems: electrical, hot air, pneumatic and chemical; Probe and drain heating; Wiper systems.	1
11.13 Landing Gear (ATA 32) Construction, shock absorbing; Extension and retraction systems: normal and emergency; Indications and warning; Wheels, brakes, antiskid and autobraking; Tyres; Steering.	2
11.14 Lights (ATA 33) External: navigation, anti-collision, landing, taxiing, ice; Internal: cabin, cockpit, cargo; Emergency.	2
11.15 Oxygen (ATA 35) System lay-out: cockpit, cabin; Sources, storage, charging and distribution; Supply regulation; Indications and warning	2
11.16 Pneumatic/Vacuum (ATA 36) System lay-out; Sources: engine/APU, compressors, reservoirs, ground supply; Pressure and vacuum pumps Pressure control; Distribution; Indications and warnings; Interfaces with other system	2

Part 66 B3 AME mechanical Trade Training Syllabi and Learning Levels

Module 17B Propeller	Level of knowledge for the category
	B3
17.1 Fundamentals 2 Blade element theory; High/low blade angle, reverse angle, angle of attack, rotational speed; Propeller slip; Aerodynamic, centrifugal, and thrust forces; Torque; Relative airflow on blade angle of attack; Vibration and resonance.	2
17.2 Propeller Construction Construction methods and material used in wooden, composite and metal propellers; Blade station, blade face, blade shank, blade back and hub assembly; Fixed pitch, controllable pitch, constant speeding propeller; Propeller/spinner installation.	2
17.3 Propeller Pitch Control Speed control and pitch change methods, mechanical and electrical/electronic; Feathering and reverse pitch; Overspeed protection.	2
17.4 Propeller Synchronising Synchronising and synchrophasing equipment.	2
17.5 Propeller Ice Protection Fluid and electrical de-icing equipment.	2
17.6 Propeller Maintenance Static and dynamic balancing; Blade tracking; Assessment of blade damage, erosion, corrosion, impact damage, delamination; Propeller treatment/repair schemes; Propeller engine running.	2
17.7 Propeller Storage and Preservation Propeller preservation and depreservation	2

Post Trade Licencing Module 10

Module 10 Aviation legislation	Level of knowledge for the category
	B3
10.1 Regulatory Framework Role of International Civil Aviation Organization; Role of CASA; Relationship between Parts 21, 42, 66, 145 and 147 of CASR 1998; Relationship with other aviation authorities.	1
10.2 Part 66 Certifying Staff Detailed understanding of Part 66 of CASR 1998.	2
10.3 Part 145 – Approved maintenance organisations Detailed understanding of Part 145 of CASR 1998.	2

Part 66 B3 AME mechanical Trade Training Syllabi and Learning Levels

Module 10 Aviation legislation	Level of knowledge for the category
	B3
10.4 Air operations	1
Air Operators' Certificates; Operators' responsibilities, in particular regarding continuing airworthiness and maintenance; Aircraft maintenance program; MEL/CDL; Documents to be carried on board; Aircraft placarding (markings).	
10.5 Certification of aircraft, parts and appliances	1
(a) <i>General</i> General understanding of Parts 21, 23, 25, 27 and 29 of CASR 1998;	
(b) <i>Documents</i> Certificates of Airworthiness; Restricted Certificates of Airworthiness; Special Flight Permits; Certificates of Registration; Noise Certificates; Weight Schedules; Radio Station Licences and Approvals.	2
10.6 Continuing airworthiness	2
(a) Detailed understanding of Part 21 of CASR 1998 provisions relating to continuing airworthiness; (b) Detailed understanding of Part 42 of CASR 1998.	
10.7 Applicable national and international requirements	2
(a) Management programs, maintenance checks and inspections; Master Minimum Equipment Lists, Minimum Equipment List, Dispatch Deviation Lists; Airworthiness Directives; Service bulletins, manufacturers' service information; Modification and repairs; Maintenance documentation: maintenance manuals, structural repair manuals, illustrated parts catalogue, etc.	
(b) Continuing airworthiness; Minimum equipment requirements — test flights; ETOPS, maintenance and dispatch requirements; All weather operations: categories 2 and 3 operations.	1
